SWICKtech Professional Services: Business objectives from the top down, technology solutions from the bottom up.

Successful IT efforts involve strategic planning, implementation, monitoring and evaluation.

The first step in the strategic planning process is to address the question, "Is my IT Infrastructure Stable?" The SWICKtech I.T. Stability Assessment is designed to provide an in-depth review of I.T. assets, processes and procedures. The findings from the assessment help your business to identify and eliminate points of failure in the I.T. systems and processes. At the completion of the assessment SWICKtech will provide a breakdown of any critical concerns as well as recommendations on how best to correct any issues.

The SWICKtech Stability Assessment will:

- Provide a detailed analysis of the current I.T. configuration.
- Identify costly security vulnerabilities
- Provide standards and best practices
- Simplify server and network paradigm
- Review server and network infrastructure sizing
- Review server and network infrastructure age and warranty
- Reviewing licensing usage and needs
- Provide a plan for growth
- Provide an assessment of the overall network stability with respect to the SWICKtech Stability CubeSM.
- Focus on properly protecting business' information.
- Focus on properly protecting business' ability to operate.
- Ensure technology is aligned with business' growth plans
- Identify and eliminate potential points of failure in your IT systems
- In-depth review of backup processes and procedures

Are your business IT systems holding your company back, or are they stable and dependable, and working every day to move your company forward while helping your business grow?

If you're not sure, contact SWICKtech today for your FREE business IT assessment. No gimmicks; no tricks – just a straight-forward, honest and professional assessment of your systems.
